

glantzdesign

a strategically creative studio

Our Story is simple.

50% strategy, 50% creative and 100% dedicated to exceeding your expectations.

We are a company that wears many hats. Sometimes it's the business hat (how can I get a better ROI?) and sometimes it's the designer hat (can you create a website, logo, advertisement or brochure for my company?)

Some call us a jack-of-all-trades, renaissance men, polymaths – yet we just really observe everything. We are idea aficionados.

We believe in the power of strategic design to magnify life, catalyze communication, and empower companies and the people who preside over them. We like to solve problems you haven't thought of yet.

Glantz Design, founded by Keith Glantz, has won awards, made some companies richer and has seen what it takes to keep clients **happy** very happy.

our specialities include, but are not limited to:

creative

We don't think in just pixels and code. In fact, our core roots started in print design and advertising. We hate wasting paper, but we love holding our designs in our hand.

web

We only design and develop websites that we are proud of. Surprisingly, that takes many shapes and forms.

business

We like to make money, and I bet so do you. So, our preference is not to go Ready, Fire, Aim.

e-commerce

We develop store front window websites, or even ones that you just browse, as it's pretty neat to have a site make money while you are asleep.

As a multidisciplinary company we work with our clients to create and implement communication solutions across a variety of media.

Can you make my logo 10% larger?

During the years that Glantz Design was just a dream, we have had the opportunity to work at some of the world's largest agencies getting our feet wet.

Our experiences have now amounted to a fantastic list of current and past clients that include:

P&G	Paterno Wines	Soma Institute
Goemar	Shiner	Forsythe
Coca-Cola	Phonak	Ear Check
Minute Maid	Citadel Plastics	Northbrook Chamber
Stoli	GlaxoSmithKline	Emanu El
Wrigley's	Kenmore	BCR Events
